

2026 EDITORIAL CALENDAR

AI has been present in the enterprise for a number of years. The arrival of generative AI (GenAI) has focused even more attention on AI technologies. GenAI takes AI beyond machine learning (ML), natural language processing (NLP), natural language understanding (NLU), deep learning, algorithmic search results, and computer vision. It adds more acronyms to our lexicon—LLMs (large language models), SLMs (small language models), and GPT (generative pre-

trained transformers). Enterprise AI has the potential to change how work is done. *Enterprise AI World* aims to reach the people who are building, deploying, and managing AI systems and applications as well as AI users. *Enterprise AI World* follows the rapidly changing technologies and keeps readers up to date with how AI will affect them.

Spring February

- › FEATURE: Building an AI Stack
- › FEATURE: The Multimodal World of Enterprise AI
- › FEATURE: Vibe Coding Takes Over the Enterprise
- * **Best Practices Report:** Building a Scalable Enterprise AI Strategy: From Pilot to Production

Summer May

- › FEATURE: Pros and Cons of Reasoning Models
- › FEATURE: Nuances of Build or Buy Decisions
- › FEATURE: Prioritizing Productivity Via Innovation
- * **Best Practices Report:** AI Agents for Data Modeling and Semantic Layer Generation

Fall August

- › SOURCEBOOK
- * **Best Practices Report:** Autonomous DataOps and AI-Driven Pipeline Orchestration

Winter November

- › FEATURE: The Future of Digital Transformation in an AI World
- › FEATURE: Assessing Enterprise AI Tools
- › FEATURE: Composability, Integration, and Scaling
- * **Best Practices Report:** Safe and Scalable LLMs: Knowledge Management, RAG, and Contextual AI

WEBINARS

- › February 18 — The Rise of Autonomous Data: How Agentic AI Is Redefining Data Management
- › April 29 — Fostering Trust in AI Systems: Governance for the Age of Intelligent Agents
- › June 24 — From Data to Knowledge: AI Agents That Discover, Connect, and Act
- › August 19 — Building Effective Agentic AI Applications for Scalable Enterprise Solutions
- › October 28 — Enhancing Enterprise Search: The Power of RAG and Knowledge Graphs in AI
- › December 9 — Agentic AI in Action: Building and Governing Autonomous Workflows
